## Introduction

The Hospital In-Patient Enquiry (HIPE) scheme, established in 1971, is a computer-based health information system designed to collect clinical and administrative data on discharges from, and deaths in, acute hospitals in Ireland. It is the principal source of national data on discharges from acute hospitals. The Economic and Social Research Institute (ESRI) oversee the administration and management of this scheme on behalf of the Health Service Executive (HSE) and the Department of Health and Children (DOHC).<sup>1</sup> Within the ESRI, the Health Research and Information Division (HRID) is responsible for overseeing all functions associated with the operation of this database, including the development and support of the data collection and reporting software, training of coders and data quality audit, reporting, and responding to requests for data. The figure below summarises the HIPE data collection and reporting process. Further information on the development of the HIPE scheme can be found in our annual report series.<sup>2</sup>

**Figure: The HIPE Data Collection and Reporting Process**

<sup>1</sup> The ESRI's HRID also oversees the administration and management of the National Perinatal Reporting System (NPRS) on behalf of the HSE.

<sup>2</sup> HIPE Annual Reports can be found on [http://www.esri.ie/health\\_information/latest\\_hipe\\_nprs\\_reports/](http://www.esri.ie/health_information/latest_hipe_nprs_reports/)

## Objectives of HIPE Data Dictionary Version 3.0

HIPE collects information on in-patient and day patient activity from participating hospitals. A HIPE discharge record is created when a patient is discharged from (or dies in) hospital. This record contains administrative, demographic and clinical information for a discrete episode of care. An episode of care begins at admission to hospital and ends at discharge from (or death in) that hospital.

This dictionary provides definitions and codes for data collected within HIPE as of 2011. It provides standard definitions for variables with the objective of ensuring that consistency and data quality are maintained. It is also hoped that the dictionary will be of use to researchers, clinicians and hospital management in understanding and analysing HIPE data.

## Using the Data Dictionary

The HIPE Data Dictionary contains publicly available information. Internal variables relating to data quality and the HIPE database structure are not included. Other exclusions from the HIPE Data Dictionary Version 3.0 are data and non HIPE cases collected from 01/01/2011 through the HIPE system but not included in the national file.<sup>3</sup>

All variables are listed alphabetically and an alphabetic index is included in the table of contents. The code sets used for variables are listed in Appendix I and can be accessed via hyperlinks. For information on the classifications for diagnoses and procedures and the casemix classification and grouping software see Appendix II.

A glossary of abbreviations is provided in Appendix III and hyperlinks to source documents and organisations are provided in Appendices IV and V respectively.

## Updates

This document will be updated as variables are added or amended.

---

<sup>3</sup> From the 01/01/2011 *all* cases categorised as Inpatients or Day cases are to be downloaded from the hospital PAS to HIPE, including those cases not normally coded on HIPE. It is expected that the additional cases in the download will be for non-acute (not normally coded) activity on the hospital campus such as rehabilitation or psychiatry. The National Casemix Programme will identify, for individual hospitals, a list of wards which should be downloaded as part of this change. These additional downloaded records are not included on the national file.

For patients discharged on or after 01/01/2011, the HIPE record will also collect information on internal ward transfers of the patient during the episode of stay. This information is typically stored in a "ward transfer file" or "ward transfer database" as part of the PAS/HIS system. This information will be downloaded to the HIPE portal and can be viewed by the coder but cannot be amended. The information will be exported by the hospital monthly to the ESRI as part of the normal export process.

## Summary of Changes between version 1.0 and 2.0 of Data Dictionary

Addition of variable: Oncology Day Ward Flag to store the value of oncology day ward repeat status.

Addition of code set: RepeatStatus; values for Oncology Day Ward Flag

Addition of Blackrock Hospice to hospital codes code set

## Summary of Changes between version 2.0 and 3.0 of Data Dictionary

The HIPE Portal is the next generation of HIPE data collection and reporting software designed by the HRID IT team at the ESRI. In 2011 it will replace the Windows HIPE software.

This migration from Windows HIPE (a windows based data entry and reporting system) to the HIPE Portal (a web based portal based on SQL server) has resulted in changes to variable names.

### Changes to Variable Name

**Diagnoses:** Rename variables from diag-CxDIA → **DIAG1–DIAG30**

**Diagnosis Consultants:** Rename variables from DCON - CxCON → **DIAGCONS1 – DIAGCONS30**

**Procedures:** Rename procedure variables from PROC –PkPRO → **PROC1-PROC20**

**Procedure Consultants:** Rename procedure consultant variables from PCON – PkCON → **PROCON1-PROCON20**

**Procedure dates:** Rename procedure date variables from P1Date or Theatre → **PROCDATE1- PROCDATE20**

**Procedure Anaesthetist:** Rename procedure date variables from P1ANA-PkANA → **ANACONS1-ANACONS20**

### Additional Variables in 2011

**Hospital Acquired Diagnosis**

**Health Insurer**

**Parity Live births**

**Parity Still births**

**Procedure dates**

**Days in Semiprivate Bed**

**Changes to Data Entry Guideline Number of Days in Intensive Care Environment**

### Additional Codes to Code sets

Additional **Specialty** Code 2605 Breast Surgery

**Hospital code** for removal of temporary transfer code for CUMH

**Variable under review Marital status**

## Page Layout

While each page does not necessarily include all fields, each page in the data dictionary has a consistent format as follows:

<b>Variable</b>	Name of variable
<b>Definition</b>	Provides a description of the variable
<b>Definition Source</b>	What is the source of the definition of this information - e.g. ESRI HIPE Unit
<b>Source</b>	Information may come from Chart, Hospital PAS, assigned by HIPE Unit, ESRI or it may be derived from other variables
<b>Collected since</b>	Month and year when collection of variable commenced, as the ESRI took over the management of the HIPE Scheme in 1990, variables in operation prior to this data will be marked as pre-1990
<b>Collected/Derived</b>	Is this variable collected from Chart or is it derived from the HIPE Portal data entry software - C = Collected & D = Derived
<b>Code Set</b>	Details the information options available for each variable
<b>Data Entry Guideline</b>	Provides further guidance on how a variable is assigned to case
<b>Data Type</b>	Integer or Alphanumeric
<b>Field Size</b>	Number of characters in the variable
<b>Variable Name</b>	Variable name in Portal/Access/SPSS or HIPE-PAS interchange
<b>Populated in National File</b>	If no, this variable is only populated in the hospital version of HIPE and is not available on the national file
<b>Reported by</b>	Who reports this variable? This will generally be the Hospital
<b>Reported for</b>	For what cases/discharges is this information reported?
<b>Order in Instruction manual</b>	The HIPE Instruction Manual forms part of the training material provided by the HIPE Unit, it provides details of administrative and demographic variables collected and is updated to reflect any changes or updates in data collection, this order is numerically based.
<b>Irish Coding Standard</b>	The Irish Coding Standards are used in conjunction with the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification (ICD-10-AM), Australian Classification of Health Interventions (ACHI) and Australian Coding Standards (ACS) apply to all activity coded in HIPE in Ireland.

<b>Reported for</b>	All cases where age less than 28 days (0-27 days), or age less than 1 year and weight less than 2,500 grams.
<b>Order in Instruction Manual</b>	9
<i>(for use with HIPE Portal)</i>	
<b>Irish Coding Standard</b>	HIPE Guideline VI

**Admitting Consultant**

<b>Variable</b>	<b>Admitting Consultant</b>
<b>Definition</b>	The consultant who admits the patient. If there is no clear information on the chart on the identity of the admitting consultant, the code for the primary consultant is used. Each consultant has a unique number/code assigned by the ESRI, which may not be used for any other consultant. The unique number assigned by the ESRI is encrypted to a unique alphanumeric code when HIPE data are exported from the hospitals. The encrypted values are stored on the HIPE National File and it is not possible to ascertain the identity of individual consultants from any of the consultant fields in the national file.
<b>Definition source</b>	ESRI HIPE Unit
<b>Source</b>	Hospital PAS
<b>Collected since</b>	1994
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	
<b>Data Entry Guideline</b>	Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnosis/procedures.

## Consultant Specialties

Variable	Consultant Specialties
<b>Definition</b>	A specialty code is assigned to the record on the basis of the specialty assignment of the consultant associated with the principal diagnosis. The specialty of the consultant is the specialty in which s/he is formally recognised and contracted to work. A consultant may be formally recognised and contracted to work in more than one specialty; in these cases one specialty is recognised as the main one.
<b>Definition source</b>	DOHC
<b>Source</b>	Hospital PAS
<b>Collected since</b>	1994
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	<a href="#">Specialty</a>
<b>Data Entry Guideline</b>	Specialty is assigned locally at the hospital from the DOHC list. A consultant may be assigned to more than one specialty .

**Discharge Consultant**

<b>Variable</b>	<b>Discharge Consultant</b>
<b>Definition</b>	The consultant who discharges the patient at the end of the episode. Each consultant has a unique number/code assigned by the ESRI, which may not be used for any other consultant. The unique number assigned by the ESRI is encrypted to a unique Alphanumeric code when HIPE data are exported from the hospitals. The encrypted values are stored on the HIPE National File and it is not possible to ascertain the identity of individual consultants from any of the consultant fields in the national file.
<b>Definition source</b>	ESRI HIPE Unit
<b>Source</b>	Hospital PAS
<b>Collected since</b>	1996 – 2001 optional; 2002 - mandatory
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	
<b>Data Entry Guideline</b>	Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnosis/procedures

### Non Acute Length of Stay: Temporary Leave Days

Variable	Non Acute Length of Stay: Temporary Leave Days
<b>Definition</b>	Number of days a patient did not spend in hospital during an episode.
<b>Definition source</b>	DOHCC
<b>Source</b>	Chart
<b>Collected since</b>	2007
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	
<b>Data Entry Guideline</b>	A patient is temporarily discharged when: the patient is allowed to leave the hospital for a short number of days; their bed in hospital remains for their use and is not available for another patient; the patient returns after the specified amount of time to continue their ongoing care. Temporary Leave Days do NOT apply in the following situations: *patient is considered clinically discharged but continues to reside in a bed prior to transfer elsewhere *patient is temporarily sent to another hospital for a day to undergo a particular procedure *where the patient returns home during a day and returns to hospital before midnight *where a patient returns home for more than 3 days and is then readmitted

## Number of Days in Intensive Care Environment

Variable	Number of Days in Intensive Care Environment
<b>Definition</b>	This identifies the number of days, or part thereof, the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU etc.
<b>Definition source</b>	ESRI HIPE Unit
<b>Source</b>	Hospital PAS
<b>Collected since</b>	1996 - 2001 optional; 2002 – 2010 mandatory. 2011 - definition revised from "based on midnight census" to "can be based on midnight census"
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	
<b>Data Entry Guideline</b>	The midnight census can be used to determine the number of days spent in these environments. If the patient spends less than 1 day in these environments and is not present at the time of the midnight census, a stay of less than one day can optionally be recorded as '1' day. Where part of day is spent in ICU the allocation of public/private/semi-private days can be adjusted accordingly.

## 10th Additional Diagnosis Consultant

Variable	10th Additional Diagnosis Consultant
<b>Definition</b>	Consultant attending 10th additional diagnosis.
<b>Definition source</b>	ESRI HIPE Unit
<b>Source</b>	Chart
<b>Collected since</b>	2005. Name change 2011- migration to Portal, formally CBCON
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	
<b>Data Entry Guideline</b>	
<b>Variable Name Portal</b>	DIAGCONS11
Access	CBCON
SPSS	DIAGCONS11
HIPE-PAS interchange	
<b>Data Type</b>	Alphanumeric
<b>Field Size</b>	4
<b>Populated in National File</b>	Y - encrypted
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
<b>Reported by</b>	Hospital
<b>Reported for</b>	All cases where a 10th additional diagnosis was made.
<b>Order in Instruction Manual</b>	
<i>(for use with HIPE Portal)</i>	
<b>Irish Coding Standard</b>	

**10th Additional Procedure**

<b>Variable</b>	<b>10th Additional Procedure</b>
<b>Definition</b>	Clinical intervention that is surgical in nature, carries a procedural risk and/or carries an anaesthetic risk and/or requires specialised training and/or requires special facilities or equipment only available in an acute care setting.
<b>Definition source</b>	6th ed ICD-10-AM/ACHI/ACS/ICS
<b>Source</b>	Chart
<b>Collected since</b>	2005. Name change 2011 - migration to Portal, formally PBPRO
<b>Collected/Derived</b>	Collected
<b>Code Set</b>	6th ed ICD-10-AM/ACHI/ACS/ICS
<b>Data Entry Guideline</b>	The order of procedures is determined by the following hierarchy: procedure performed for treatment of principal diagnosis, procedure performed for treatment of an additional diagnosis, diagnostic/exploratory procedure related to principal diagnosis, diagnostic procedure related to additional diagnosis.
<b>Variable Name Portal</b>	PROC11
Access	PBPRO

## Appendix I - CODE SETS

### ADMSOURCE - Source of Admission

Code	Description
1	Home
2	Transfer from nursing home/convalescent home or other long stay accommodation
3	Transfer from Acute Hospital. <i>When the coder enters a transfer (3) as a source of admission the system will respond with a request to identify the hospital in question - identified using the 4-digit Department of Health and Children <a href="#">hospital code</a>.</i>
4	Transfer from Non-Acute hospital not in HIPE hospital listing
5	Transfer from hospice not in HIPE hospital listing
6	Transfer from psychiatric hospital/unit
7	New born
8	Temporary place of residence
9	Prison
0	Other

### ADMTYPE - Admission Type

Code	Description	Definition
1	Elective	The patient's condition permits adequate time to schedule the availability of suitable services, an elective admission can be delayed without substantial risk to the health of the individual.
2	Elective readmission	Patient admitted electively to the same hospital where they had previous treatment/care to continue ongoing treatment or care.
4	Emergency	The patient requires immediate care and treatment as a result of a severe, life threatening or potentially disabling condition. Generally the patient is admitted through the Emergency Department.
5	Emergency Readmission	This is an unscheduled readmission following previous spell of treatment in same hospital and relating to the treatment or care previously given.
6	Maternity	The patient is admitted related to their obstetrical experience. (From conception to 6 weeks post delivery).
7	New born	Neonate (0 - 27 days old) admitted to hospital for care or observation as an emergency or unplanned.

### DAYCASE

Code	Description
0	In-patient
1	Daycase

**DISC\_CODE – Discharge Code**

Code	Description
00	Self discharge
01	Home
02	Nursing home, convalescent home or long stay accommodation
03	Transfer to Hospital - Emergency
04	Transfer to Hospital - Non Emergency
05	Transfer to psychiatric hospital/unit
06	Died with post mortem
07	Died no post mortem
08	Transfer to Non-Acute hospital <u>not</u> in HIPE Hospital Listing - Emergency
09	Transfer to Non-Acute hospital <u>not</u> in HIPE Hospital Listing - Non Emergency
10	Transfer to external rehabilitation facility ( <u>not</u> in HIPE Hospital Listing)
11	Hospice ( <u>not</u> in HIPE Hospital Listing)
12	Prison
13	Absconded
14	Other (e.g. Foster care)
15	Temporary place of residence (e.g. hotel)

**DIS\_STATUS – Discharge Status**

Code	Description
1	Public
2	Private

**EMADM – Mode of Emergency Admission**

Code	Description
1	ED Emergency Department
2	MAU (admitted as in-patient)
3	Other
4	Unknown
5	MAU Day only

**Enc\_Type - Additional Encounter Type**

Code	Description
A	Anaesthetist
D	Diagnosis
P	Procedure

**Health Insurer**

Code	Description
1	Voluntary Health Insurance (VHI)
2	Quinn Healthcare
3	Aviva
4	Hospital Saturday Fund (HSF)
5	Company Insurance Plan (ESB etc)
6	State Employee Insurance (e.g. Prison officer, Garda, Army)
8	Not stated
9	Other
0	No insurance

## Hospital Codes
