

H.I.P.E.

Hospital In-Patient Enquiry

2009

INSTRUCTION MANUAL

01.01.09

HIPE Unit, Health Research & Information Division,
ESRI.

INSTRUCTIONS FOR THE CODER

Before you begin, make sure you have...

- 6th Edition ICD-10-AM/ACHI/ACS classification:
 - 5 Volume book set or e-Book
- White ICD-10-AM/ACHI/ACS training binder (as issued at training courses)
- Instruction Manual
- Irish Coding Standards
- Record summary sheets (if required)
- *All above supplied by HIPE Unit, ESRI*

Also..

- Medical Dictionary e.g. Dorland's
 - M.I.M.S. - Index of Drugs
-

Contact Us

ICD-10-AM Clinical Coding

Coding queries may be submitted by e-mail with as much detail as possible to:
HIPEcodingquery@esri.ie

Exports

Exports may be submitted by e-mail to export@esri.ie

Statistics

To request HIPE data and statistics, please complete the HIPE data request form, which is available at www.esri.ie/health_information/hipe/

Completed data request forms may be submitted to HIPEdatarequests@esri.ie

HIPE Software Support

Any queries related to HIPE software can be submitted by e-mail to Hipe.IT@esri.ie

Other support:

Phone: (01) 8632000. Fax: (01) 8632100. Website: www.esri.ie

HIPE Unit, ESRI, Whitaker Square, Sir John Rogerson's Quay, Dublin 2.

HIPE & NPRS Manager

Deirdre Murphy Phone: (01) 8632000 E-mail: deirdre.murphy@esri.ie

Patient Discharge Information			W/List If=1-2	Mode If=4,5,7

(8) 	[]			
(9) 	[]			
(10) 	[]	Up to 20 procedure codes may be entered on W-HIPE as appropriate – Continue on reverse of sheet if necessary		

All HIPE Data are subject to Audit (including chart based reviews)

The arrow beside a field below refers to items downloaded by the PAS where available.

↓ These fields must always be verified against the information in the chart.

1. **Hospital No:** A 3 digit code number allocated to your hospital by the ESRI for HIPE purposes is automatically assigned by the data entry software. This code number differs from the 4-digit Department of Health Hospital codes which are used for transfers to and from the hospital.

- ↓ 2. **Chart Number:** Up to 7 characters allowed. If less than 7, place zeros before the chart number (or case reference number). Up to 2 alpha characters allowed, again place these before the chart number and in the first position(s).

- ↓ 3. **Date of Admission:** Enter day, month and year in appropriate boxes, inserting zeros where necessary.
e.g. 1st March 2009 =

01	03	2009
----	----	------

Admission codes

Type of Admission

This indicates the *priority* of the admission.

↓ 4. Type of Admission - The *priority* of the admission

1 Elective –

The patient's condition permits adequate time to schedule the availability of suitable accommodation. An elective admission can be delayed without substantial risk to the health of the individual.

2 Elective Readmission –

Patient admitted electively to continue ongoing treatment or care.

3 Elective Maternity – [not for use after 01.01.09]

The patient is admitted electively related to their obstetrical experience.
(From conception to 6 weeks post delivery).

For Maternity admissions dated on or after **01.01.09** see **No. 6 Maternity** type of admission below.

4 Emergency –

The patient requires immediate care and treatment as a result of a severe, life threatening or potentially disabling condition. Generally, the patient is admitted through the Accident & Emergency Department.

5 Emergency Readmission –

This is an unscheduled readmission following previous spell of treatment in same hospital and relating to the treatment or care previously given.

6 Maternity – [for use on admissions on or after 01.01.09]

The patient is admitted related to their obstetrical experience.

(From conception to 6 weeks post delivery).

7 New born (0-27 days) –

Neonate admitted to hospital for care or observation. Type of admission '7' will be used for patients up to the age of 28 days (0-27 days old) who are admitted to the hospitals as an emergency or are unplanned.

Note: Any other neonatal patients (0-27 days old) admitted routinely will be assigned the regular booked admission type.

“Type” of Waiting List category

When a user indicates that the admission type is either **1- Elective** or **2 - Elective Readmission** a display box appears on the screen to collect if the case is funded by the National Treatment Purchase Fund (NTPF).

0 – Not NTPF

1 – Yes NTPF

Elective MAU Admissions:

Elective admissions to registered MAUs will record an elective admission type. The admitting ward will record the MAU ward code and the discharge ward will be coded as appropriate.

Mode of Emergency Admission

This information indicates where the patient was treated *prior to being admitted* into the hospital as an inpatient or when the patient was treated only in a registered Medical Assessment Unit (MAU).

When the user chooses a **Type of Admission: Emergency or Newborn**, a display box presents the options of:

1 A/E

2 MAU – **Admitted as InPatient.**

This code is assigned if the patient is admitted to the hospital through the MAU.

3 Other

4 Unknown

5 MAU– **Day Only.**

This code is assigned if the patient is admitted as an emergency to the MAU and discharged from there on the same day.

Note: *Once a MAU has been registered with the National Casemix Programme at the HSE contact the HIPE Unit IT Department to activate MAU W-HIPE options.*

5. Source of Admission - *Where* the patient was prior to admission.

- 1 Home
- 2 Transfer from nursing home/convalescent home or other long stay accommodation
- 3 Transfer from Hospital in HIPE Hospital listing or transfer from *any* Acute Hospital not specified in HIPE Hospital listing (see pages 15 – 16 in this manual).

When the coder enters a transfer (3) as a source of admission the system will respond with a request to identify the hospital in question. This hospital may be entered as a 4-digit code from the table of Department of Health and Children hospital codes (See pull down menu on PC or listing at the end of this instruction manual).

- 4 Transfer from Non-Acute Hospital not in HIPE Hospital listing
- 5 Transfer from hospice not in HIPE Hospital listing
- 6 Transfer from psychiatric hospital/unit
- 7 New born
- 8 Temporary place of residence (e.g. hotel)
- 9 Prison
- 0 Other

6. Date of Discharge

Enter the appropriate date in the appropriate boxes inserting zeros where necessary.

e.g. 10th March 2009 =

10	03	2009
----	----	------

7. Discharge codes identify the discharge destination

- 00 - Self discharge
- 01 - Home
- 02 - Nursing home, convalescent home or long stay accommodation
- 03 - Transfer to Hospital in HIPE Hospital listing or transfer to *any* Acute Hospital not specified in HIPE Hospital listing (see pages 15 – 16 in this manual). **Emergency**
- 04 - Transfer to Hospital in HIPE Hospital listing or transfer to *any* Acute Hospital not specified in HIPE Hospital listing (see pages 15 – 16 in this manual). **Non Emergency**

When the coder enters a transfer (03 or 04) as a discharge code the system will respond with a request to identify the hospital in question. This hospital may be entered by a 4-digit code number from the table of Department of Health and Children hospital codes (See pull down menu on PC or listing at the end of this instruction manual).

- 05 - Transfer to psychiatric hospital/unit
- 06 - Died with post mortem
- 07 - Died no post mortem
- 08 - Transfer to Non-Acute hospital not in HIPE Hospital Listing - Emergency
- 09 - Transfer to Non-Acute hospital not in HIPE Hospital Listing - Non Emergency
- 10 - Transfer to external rehabilitation facility (not in HIPE Hospital Listing)
- 11 - Hospice (not in HIPE Hospital Listing)
- 12 - Prison
- 13 - Absconded
- 14 - Other (e.g. Foster care)
- 15 - Temporary place of residence (e.g. hotel)

↓

8. Date of Birth

The date of birth is stored as 8 digits (dd/mm/yyyy). It is possible to key the last two digits of the year (yy) and the software will convert this to a year this century (20yy). If the date of birth is unknown the year must be estimated and entered with the day and month being keyed as 00/00 e.g. 1980 = 00/00/1980.

↓

9. Infant Admission Weight

For patients aged less than 1 year of age, admission weight is collected in grams in the following circumstances:

- Required for all neonates (0-27 days old)
- Required for infants up to 1 year of age **with** an admission weight less than 2,500 grams.

The value collected will be the weight in whole grams on admission. If the patient is admitted on the day of birth, the admission weight will be the birth weight.

↓

10. Sex

Enter appropriate code:

- 1 - Male
- 2 - Female
- (3 - Unknown) *Rare and Unlikely*

↓

11. Marital Status

Enter appropriate code:

- | | |
|-------------|--------------------------------|
| 1 – Single | 4 - Other (includes separated) |
| 2 – Married | 5 - Unknown |
| 3 – Widowed | 6 - Divorced |

↓

12. Medical Card Indicator

This relates to the patient's eligibility and not to the status of bed used by the patient during the stay in hospital. If the patient has full eligibility for health services and has a medical card, the coder will enter the appropriate code

- 0 - No 1 - Yes 2 – Unknown

↓

13. GMS Patient Number

If a coder enters 1 (Yes) in the medical card indicator field they will then enter the GMS (General Medical Services/Medical Card) number for the patient.

14. Area of Residence

The area of residence code identifies the place where the person would normally reside, i.e. 'home address'. Foreign nationals now resident in this country would have a code assigned for where they now live in Ireland. Foreign visitors here for short stays would be coded to the country where they normally reside.

DUBLIN HIPE POSTAL CODES

North Dublin – 0100 (all **odd** numbered postal codes)

South Dublin – 0200 (all **even** numbered postal codes)

For further specificity a patient's own Dublin postal codes may be incorporated into these codes, 0100 & 0200. Please see the the list of examples below.

Address	Code	Address	Code	Address	Code
Arbour Hill (7)	0107	Darndale (17)	0117	Monkstown	0200
Artane (5)	0105	Dartry (6)	0206	Mt. Merrion	0200
Baily (13)	0113	Deans Grange	0200	Mulhuddart (15)	0115

Crumlin (12)	0212	Merrion (4)	0204	Windy Arbour (14)	0214

↓ **15. Patient status on discharge**

Refers to the public/private status of the patient and not to the type of bed occupied. Either public or private must be specified.

Enter appropriate code:

1 - Public

2 - Private

↓ **16. Was this a Day Case?**

A day case is a patient who is admitted to hospital on an elective basis for care and/or treatment which does not require the use of a hospital bed overnight and who is discharged as scheduled. (*Source: Department of Health and Children, September 1993*).

Enter appropriate code: **0** - No **1** – Yes

↓ **17. Day Ward Indicator**

If the patient is identified as a day case it is necessary to denote that the patient was admitted to a dedicated named day ward. The options presented will be

0 - No **1** - Yes **2** - Unknown.

Hospitals must register their dedicated day wards with the National Casemix Programme, HSE prior to using this facility.

↓ **18. Day Ward Identifier**

If the answer to Day Ward Indicator is **1 – Yes**, the pre-registered Day Ward indicator must be entered to identify the day place where the patient was treated.

↓ **19. ITU/ICU days (where applicable)**

This identifies the number of days the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU etc, as a whole number.

The midnight census will be used to determine the number of days spent in these environments.

20. Consultant Identifiers

Each consultant has a unique number (4 digit code) assigned by the ESRI which may *not* be used for any other consultant. When a consultant (including non-permanent consultants) takes up duty a written request for a new (or existing) number is sent to the ESRI.

Notes:

- **For data entry purposes, where the entire case is handled by one consultant his/her code number need only to be entered opposite the principal diagnosis.**
- **If more than one consultant is involved in a case** the relevant consultant code number will be placed opposite the relevant diagnoses/procedures.
- **A specialty code is assigned to the record on the basis of the specialty assignment of the consultant associated with the principal diagnosis.** The specialty assignment of the consultant is determined locally on the basis of the listing of specialty codes. See listing at the end of this instruction manual.

21. Consultant Types

↓ **21a Primary Consultant**

The primary consultant of a case is the consultant who has overall responsibility for the case. If there is no clear information in the chart on the identity of the primary consultant, the code for the discharge consultant will be used.

↓ **21b Admitting Consultant**

The admitting consultant is the consultant who admits the patient. If there is no clear information in the chart on the identity of the admitting consultant, the code for the primary consultant will be used.

↓ **21c Discharge Consultant**

The discharge consultant is the consultant who discharges the patient at the end of the episode.

21d Consultant Anaesthetists

The consultant anaesthetist should be recorded next to the procedure where a coded anaesthetic was administered as part of the procedure. The operating consultants' and consultant anaesthetists' codes will also be repeated against the anaesthetic code for the procedure.

If there is no coded anaesthetic for a procedure then there will be no code entered for the consultant anaesthetist. The existing coding standard on the administration of local anaesthetic (ACS 0031) continues to apply and, as such, neither local anaesthetics nor the consultants who administer them should be coded.

21e Intensive Care Consultant

Consultant codes are assigned for Intensive Care Consultants/Consultant Intensivists when a patient spends any time in an intensive care environment and this is documented in the chart. Codes for up to ten Intensive Care Consultant/Consultant Intensivists can be entered on the patient's HIPE record.

22. Number of days in a private or semi-private bed (where applicable)

The midnight census will be used to determine the number of days spent in these environments.

Same day in-patient and day cases allocated a private/semi-private bed are to be counted as one private day.

23. Number of days in a public bed (where applicable)

The midnight census will be used to determine the number of days spent in this environment.

Same day in-patients and day cases allocated a public bed count as one public day.

24. Procedure Dates (where applicable)

Enter the relevant dates of the first and principal procedures. Where the principal procedure was performed first the date of the principal procedure is the only date entered.

Note: If a minor procedure is performed prior to the principal procedure the date of the minor procedure will be entered as the date of the first visit to theatre and the later date of the principal procedure will be entered as the date of the principal procedure.

25. Ward Identification

The ward identifier can be up to 6 characters in length.

- Admitting ward:

The ward to which the patient is formally admitted. If the admission ward is unclear the coder should determine the ward based on the midnight census.

- Discharge ward:

The ward occupied prior to discharge.

(Source: Department of Health & Children CX06/2006)

26. Temporary leave days (where applicable)

For all discharges the number of temporary leave days will be collected to “enable the collection of information on the number of days during an in-patient stay where the patient is not in the hospital and has been temporarily sent home.” (Source: Department of Health & Children CX06/2006)

There will be a single HIPE record to include the total length of stay in days from the patient’s original admission to the eventual final discharge.

This field will **not** be collected where:

- A patient is considered to be “clinically discharged” but continues to reside in a bed for a number of days prior to being transferred to another facility.
- Where a patient is temporarily sent to another hospital for a day to undergo a particular procedure.
- Where the patient returns home during a day and returns before midnight.
- Where a patient returns home for more than three days and is readmitted after this.

Batch Coding Facility for Radiotherapy and Dialysis Episodes

A W-HIPE program is available to facilitate the collection of same day radiotherapy and dialysis episodes. Please contact the HIPE Unit for information on this software.

Contact the IT Department at the HIPE Unit, ESRI to activate the following field

Optional Field

- **Date of transfer to a Pre-Discharge Unit/Rehab** (where applicable)

A date may be collected to identify when a patient was *transferred* to a Pre-Discharge Unit/Rehab within the hospital prior to being discharged as planned. *Prior to collecting this additional field hospitals must register the Pre-Discharge Unit/Rehab with the National Casemix Programme, HSE.*

By definition this will not be the same as discharge date.

e.g. A patient is transferred to the Pre-Discharge Unit/Rehab of their hospital on 16th March 2009 and is discharged home from the Pre-Discharge Unit/Rehab 3 days later on the 19th March 2009

Date of transfer to Pre-Discharge Unit/Rehab	16	03	2009
Date of Discharge from Hospital	19	03	2009

DEPARTMENT OF HEALTH & CHILDREN HOSPITAL CODES

(For use with transfers)

Dublin and Mid Leinster Region
