

H.I.P.E.

Hospital In-Patient Enquiry

INSTRUCTION MANUAL

INSTRUCTIONS FOR THE CODER

Before you begin, make sure you have...

-  ICD-9-CM coding book (1999)
 -  Red training binder (as issued at Basic coding course)
 -  Instruction manual
 -  Record summary sheets (if required)
- (all above supplied by HIPE Unit, ESRI)*

Also..

-  Medical Dictionary e.g. Dorland's.
-  M.I.M.S. - Index of Drugs

For Help....

Coding/Training/Audit

-  Jacqui Curley 01-6307184
-  Marie Glynn 01-6307183
-  Deirdre Murphy 01-6307182

Coding queries submitted by e-mail
may be sent with as much detail as possible (see Help! sheet for guidelines of information required)
to: HIPECodingquery@esri.ie

Statistics/Exports

-  Anne Clifton (01-6307163: e-mail anne.clifton@esri.ie)
-  Aisling Mulligan (01-6307164: e-mail aisling.mulligan@esri.ie)
-  Natalie Wall (01-6307165 : e-mail natalie.wall@esri.ie)

Software training

-  Phil Dowling (01-6307162 : e-mail philomena.dowling@esri.ie)

Software Support

-  Brian McCarthy (01-6307174 : e-mail brian.mccarthy@esri.ie)
-  Shane McDermott (01-6307173 : e-mail shane.mcdermott@esri.ie)
-  Mark McKenna (01-6307172 : e-mail mark.mckenna@esri.ie)
-  Joe Hunter (01-6307171 : e-mail joe.hunter@esri.ie)

All above available at:

HIPE Unit, ESRI, 4, Burlington Road, Dublin 4.

Phone: (01) 6671525 Fax: (01) 6686231

Date of 1st Procedure / / Date of Principal Procedure / / Case Entered on pc Comment:

For use on all discharges from 1.1.2004

All HIPE Data are subject to Audit (including chart based reviews)

The arrow beside a field below refers to items downloaded by the PAS where available. These fields must always be verified against the information in the chart.

1. **Hospital No:** A 3 digit code number allocated to your hospital by the ESRI for HIPE purposes is automatically assigned by the data entry software. This code number differs from the 4-digit Department of Health Hospital codes which are used for transfers to and from the hospital.

- ↓
2. **Chart Number:** Up to 7 digits allowed. If less than 7, place zeros before the chart number (or case reference number). Up to 2 alpha digits allowed, again place these before the chart number and in the first position(s).

- ↓
3. **Date of Admission:** Enter day, month and year in appropriate boxes, inserting zeros where necessary.

e.g. 1st March 2004

| 01 | 03 | 2004 |

Type of AdmissionThis indicates the *priority* of the admission.**Source of Admission***Where* the patient was prior to admission.**Type of Admission - The *priority* of the admission**

1 Elective - The patient's condition permits adequate time to schedule the availability of suitable accommodation. An elective admission can be delayed without substantial risk to the health of the individual.

2 Elective Readmission - Patient admitted electively to continue ongoing treatment or care.

3 Elective Maternity - The patient is admitted electively related to their obstetrical experience (From conception to 6 weeks post delivery).

4 Emergency - The patient requires immediate care and treatment as a result of a severe, life threatening or potentially disabling condition. Generally, the patient is admitted through the Accident & Emergency Department.

5 Emergency Readmission - This is an unscheduled readmission following previous spell of treatment in same hospital and relating to the treatment or care previously given.

6 Emergency Maternity - The patient is admitted as an emergency related to their obstetrical experience (From conception to 6 weeks post delivery).

7 New born (0-27 days) - Neonate admitted to hospital for care or observation.

- Type of admission '7' will be used for patients up to the age of 28 days (0-27 days old) who are admitted to the hospitals as an emergency or are unplanned.
- Any other neonatal patients (0-27 days old) admitted routinely will be assigned the regular booked admission type codes

"Type" of Waiting List category

When a user indicates that the admission type is either **1- Elective** or **2 - Elective Readmission** a display box appears on the screen to collect if the case is funded by the National Treatment Purchase Fund (NTPF).

0 – Not NTPF

1 – Yes NTPF

Mode of Emergency admission

When the user chooses **Type of Admissions: 4-7** (Emergency), a display box presents the options of:

1 A/E

2 Medical Assessment Unit (MAU)

3 Other

4 Unknown

This information indicates where the patient was treated *prior to being admitted* into the hospital as an inpatient. HIPE does not collect patients who are assessed in MAUs and not subsequently admitted.

Source of Admission - Where the patient was prior to admission.

1 Home

2 Transfer from nursing home/convalescent home or other long stay accommodation

3 Transfer from Hospital in HIPE listing or transfer from any Acute Hospital not specified in HIPE listing (see pages 13 – 15 in this manual).

When the coder enters a transfer (3) as a source of admission the system will respond with a request to identify the hospital in question. This hospital may be entered as a 4-digit code from the table of Department of Health and Children hospital codes

4 Transfer from Non-Acute Hospital not in HIPE listing

5 Transfer from hospice not in HIPE listing

6 Transfer from psychiatric hospital/unit

7 New born

8 Temporary place of residence e.g. hotel

9 Prison

0 Other

↓

6. Date of Discharge

Enter the appropriate date in the appropriate boxes inserting zeros where necessary.

e.g. 10th March 2004

| 10 | 03 | 2004 |

↓

7. Discharge codes identify the discharge destination

00 - Self discharge

01 - Home

02 - Nursing home, convalescent home or long stay accommodation

03 - Transfer to **Hospital** in HIPE listing or transfer to *any Acute* Hospital not specified in HIPE listing (see pages 13 – 15 in this manual). **Emergency**

04 - Transfer to **Hospital** in HIPE listing or transfer to *any Acute* Hospital not specified in HIPE listing (see pages 13 – 15 in this manual). **Non Emergency**

When the coder enters a transfer (03 or 04) as a discharge code the system will respond with a request to identify the hospital in question. This hospital may be entered by a 4-digit code number from the table of Department of Health and Children hospital codes (See pull down menu on PC or listing at the end of this instruction manual).

05 - Transfer to psychiatric hospital/unit

06 - Died with post mortem

07 - Died no post mortem

08 - Transfer to Non-Acute hospital not in HIPE Hospital Listing - Emergency

09 - Transfer to Non-Acute hospital not in HIPE Hospital Listing - Non Emergency

10 - To rehabilitation facility (not in HIPE Hospital Listing)

11 - Hospice (not in HIPE Hospital Listing)

12 - Prison

13 - Absconded

14 - Other (e.g. Foster care)

↓

8. Date of Birth

The date of birth is stored as 8 digits (dd/mm/yyyy). It is possible to key the last two digits of the year (yy) and the software will convert this to a year this century (20yy). If the date of birth is unknown the year must be estimated and entered with the day and month being keyed as 00/00

e.g. 1970 = 00/00/1970.

↓

9. Infant Admission Weight

For patients aged less than 1 year of age it is possible to collect admission weight. The value collected will be the weight in whole grams on admission and is required for neonates (0-27 days old) and infants up to 1 year of age with admission weight less than 2,500 grams. If the patient is admitted on the day of birth, the admission weight will be the birth weight.

↓
10. Sex

Enter appropriate code:

1 - Male

2 - Female

(3 - Unknown) *Rare and Unlikely*

↓
11. Marital Status

Enter appropriate code:

1 - Single

2 - Married

3 - Widowed

4 - Other (includes separated)

5 - Unknown

6 - Divorced

↓
12. Medical Card Indicator

This relates to the patient's eligibility and not to the status of bed used by the patient during the stay in hospital. If the patient has full eligibility for health services i.e. has a medical card, the coder will enter the appropriate code

0 - No **1** - Yes **2** - Unknown

↓
13. GMS Patient Number

If a coder enters **1** (Yes) in the medical card indicator field they will then enter the GMS (General Medical Services/Medical Card) number for the patient.

13. Area of Residence

The area of residence code identifies the place where the person would normally reside, i.e. 'home address'. Foreign nationals now resident in this country would have a code assigned for where they now live in Ireland. Foreign visitors here for short stays would be coded to the country where they normally reside.

DUBLIN HIPE POSTAL CODES

North Dublin – 0100 (all **odd** numbered postal codes)

South Dublin – 0200 (all **even** numbered postal codes)*

For further specificity a patient's own Dublin postal codes may be incorporated into these codes, 0100 & 0200. Please see the the list of examples below.

* Dun Laoire Borough is an exception to this rule with a unique code of 0217.

15. Patient status on discharge

Refers to the public/private status of the patient and not to the type of bed occupied. Either public or private must be specified.

Enter appropriate code:

1 - Public

2 - Private

16. Was this a Day Case?

A day case is a patient who is admitted to hospital on an elective basis for care and/or treatment which does not require the use of a hospital bed overnight and who is discharged as scheduled. Dialysis patients treated in dedicated dialysis units are excluded from this definition. (*Source: Department of Health and Children, September 1993*)

Enter appropriate code: **0** - No **1** – Yes

17. Day Ward Indicator

If the patient is identified as a day case it is necessary to denote that the patient was admitted to a dedicated named day ward. The options presented will be

0 - No **1** - Yes **2** - Unknown.

Hospitals must register their dedicated day wards with the Department of Health and Children prior to using this facility.

18. ITU/ICU days

This identifies the number of days the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU, as an integer value.

The midnight census will be used to determine the number of days spent in these environments.

19. **Admitting Consultant**

Each consultant has a unique number assigned by the ESRI which may *not* be used for any other consultant. When a new consultant takes up duty a written request for a new number is sent to the ESRI.

Note: Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnoses/procedures.

A specialty code is assigned to the record on the basis of the specialty assignment of the consultant associated with the principal diagnosis. The specialty assignment of the consultant is determined locally on the basis of the listing of specialty codes compiled by the Department of Health and Children. See listing at the end of this instruction manual.

20. **Discharge Consultant**

This identifies the consultant who discharges the patient at the end of the episode and is identified using the same four-digit code scheme as the admitting consultant.

21. **Number of days in a private or semiprivate bed** (where applicable)

The midnight census will be used to determine the number of days spent in these environments.

Same day in-patient and day cases allocated a private/semi-private bed are to be counted as one private day.

22. **Procedure Dates**

Enter the relevant dates. Where the principal procedure was performed on the first visit to theatre the date of the principal procedure is the only date entered.

Note: If a minor procedure is performed prior to the principal procedure the date of the minor procedure will be entered as the date of the first visit to theatre and the later date of the principal procedure will be entered as the date of the principal procedure.

Optional Fields

• Date of transfer to a Pre-Discharge Unit

A date may be collected to identify when a patient was *transferred* to a pre-discharge unit as appropriate prior to being discharged as planned. *Hospitals must provide the Department of Health and Children with details of the Pre-Discharge Unit prior to collecting this additional field.*

By definition this will not be the same as discharge date.

e.g.

A patient is transferred to the Pre-Discharge Unit of their hospital on 16th March 2004 and is discharged home from this unit 3 days later on the 19th March 2004

Date of transfer to Pre-Discharge Unit

16	03	2004
----	----	------

Date of Discharge from Hospital

19	03	2004
----	----	------

• No of days in a Public bed.

The midnight census will be used to determine the number of days spent in this environment.

Same day in-patients and day cases allocated a public bed count as 1 public day (optionally collected).

Optional Local Fields:

It is possible to collect 2 optional extra fields which can be used locally but are not exported:

• Discharge ward

• Admitting ward

If you would like to download or key these fields contact Anne Clifton or Brian McCarthy.
